

Dear Dr. Jane Henney,

I urge you to ban all antibiotics in animal feeds. It is outrageous that human health is placed at risk in order to promote growth of farm animals. I hope the FDA will get in line with the overwhelming 27917 <sup>27917 JUN 14 P.1.31</sup> antibiotic resistance and stand up to Agro-business.

It should be noted that the WHO and CDC support a ban on antibiotic use for non-therapeutic application.

Thank you

Jared Babula
